# Domino

design by Chiaramonte/Marin

Defining space is what design is all about, and with the new Domino modular panel system from emu, bringing order and a little privacy to the outdoors has never been easier. With a variety of different styles to choose from, Domino can be mixed and matched side by side or stacked providing nearly endless configurations and design possibilities. These versatile dividers are offered in tempered glass, high-pressure laminates and solid or decorative aluminum patterns while optional flower boxes add another layer of visual interest and personal expression to any outdoor space. Domino is constructed of aluminum alloy with steel bases that are powder coated for exceptional durability to withstand nature's toughest elements while ensuring beauty and quality that lasts.
